Data

To find the best location for our Pizza Place, we will use the following sources of information:

- Newyork has a total of 5 boroughs and 306 neighborhoods. In order to segement the neighborhoods and explore them, we will essentially need a dataset that contains the 5 boroughs and the neighborhoods that exist in each borough as well as the the latitude and logitude coordinates of each neighborhood.

    Luckily, this dataset exists for free on the web. Here is the link to the dataset: http://cocl.us/new_york_dataset

- From Foursquare Venues Categories
  - https://developer.foursquare.com/docs/resources/categories
